Tesla Vehicle Production & Deliveries and Date for Financial Results & Webcast for First Quarter 2024

In the first quarter, we produced over 433,000 vehicles and delivered approximately 387,000 vehicles. We deployed 4,053 MWh of energy storage products in Q1, the highest quarterly deployment yet.

Decline in volumes was partially due to the early phase of the production ramp of the updated Model 3 at our Fremont factory and factory shutdowns resulting from shipping diversions caused by the Red Sea conflict and an arson attack at Gigafactory Berlin.

	Production	Deliveries	Subject to operating lease accounting
Model 3/Y	412,376	369,783	2%
Other Models	20,995	17,027	1%
Total	433,371	386,810	2%

Our net income and cash flow results will be announced along with the rest of our financial performance when we announce Q1 earnings. Tesla vehicle deliveries and storage deployments represent only two measures of the company's financial performance and should not be relied on as an indicator of quarterly financial results, which depend on a variety of factors, including average selling price, cost of sales, foreign exchange movements and others as to be disclosed in the 10-Q for the quarter ended on March 31, 2024.
