Our net income and cash flow results will be announced along with the rest of our financial performance when we announce Q4 and full year 2022 earnings. Tesla vehicle deliveries represent only one measure of the company's financial performance and should not be relied on as an indicator of quarterly financial results, which depend on a variety of factors, including the cost of sales, foreign exchange movements and mix of directly leased vehicles.

Statements herein regarding our production and delivery volumes are "forward-looking statements" based on management's current expectations and are subject to risks and uncertainties. Various important factors could cause actual results to differ materially, including the risks identified in our SEC filings. Tesla disclaims any obligation to update this information.
